bond

part

whole

What children will practice: Finding number bonds to 5 and 10 using part-whole models and shaker boxes.

How to use:

1. Look at the whole number at the top.
2. Find the two parts that add up to the whole.
3. Fill in the missing part in the model.
4. Use counters if you need help.
5. Celebrate every correct bond!

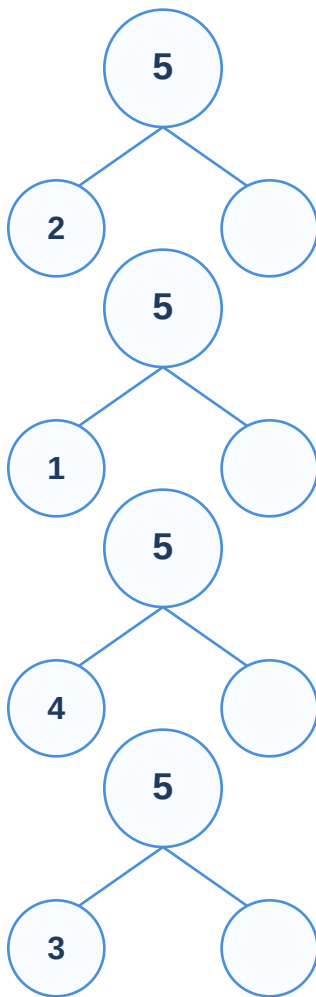

Tips:

- Number bonds help children understand addition and subtraction.
- Start with bonds to 5 before bonds to 10.
- Part-whole models show how numbers are made of parts.

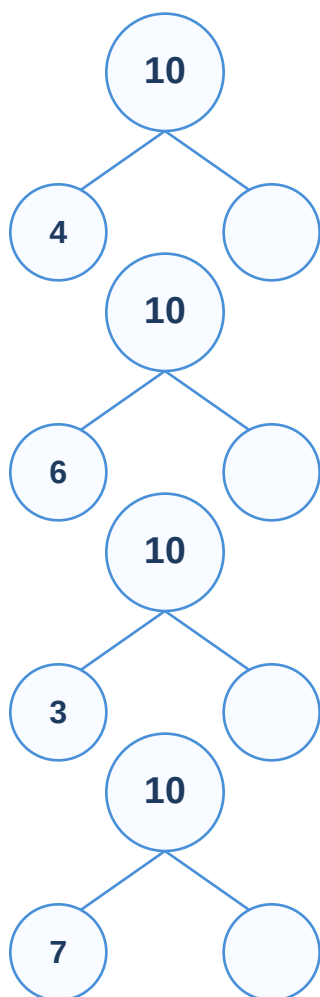

Activities included:

- Number bonds to 5
- Number bonds to 10
- Part-whole models
- Shaker box style activities

Fill in the missing part to make 5.

Fill in the missing part to make 10.

Fill in the missing number to make the total.
